Эффективные продукты каннабиса

Точная и надежная характеристика как чистоты, так и эффективности продуктов каннабиса зависит от использования высококачественных эталонных стандартов. Эти стандарты составляют основу ваших аналитических результатов — от разработки и проверки методов до калибровки приборов, ежедневного контроля качества и проверки пригодности системы.

Мы предлагаем полный набор аналитических стандартов и сертифицированных эталонных материалов (CRM), продвигая безопасные и эффективные продукты каннабиса для пациентов и потребителей. Мы предоставляем стандарты для тестирования терпенов, каннабиноидов, пестицидов, микотоксинов и тяжелых металлов, от подготовки аналитического образца до растворителей высокой чистоты, колонок и CRM, в дополнение к тестированию активности каннабиса и многому другому.
